

City Hall Back Yard	Savannah Trail	Valley Creek	Cougar Creek	Violet Crown Trail	Brodie Lane	Drainage/ Water and Wastewater	Reese & Sunset	Multiple Subjects	Other
City Hall backyard: No swings or slide please - Yes for labyrinth	Savanna Trail – not enough traffic on trail to do much, no fence please. Maybe electrical	Valley Creek Park – I support : Western fence, revegetation. Updating the swings. Could use some impervious parking	Any plans to improve the Cougar Creek Trail	Violet Crown Trail - Be good custodians of our \$! This might not be best use of funds!	Brodie Lane – If the city widens the sidewalk who replaces the grass, shrubs and sprinkler systems that get ruined? Who does the landscape maintenance?	Drainage improvements, the dam – only if we HAVE to	9 Reese – KEEP IT WILD – Remove fence, remove invasive bamboo, chinaberry tree, add informal walking trail between Reese & Sunset	1. Stearns Lane ph 2 – Finish what was started 2. Lift Station – has a belly/sag 3. Check Valves dated 4. Oakdale Water Line – 4 properties city water 5. Market Fair 12” 6. Pillow Rd to Reese Connect 7. Lone Oak to Pillow 8. Then reassess	Only do what we need to do. Less projects. New engineers. Be good stewards of our funds & energy
City Hall Backyard- I would love, love, love to have a labyrinth in the city but I don't feel like this is the spot it. It's too busy & bustling	Savanna Trail – I support water fountains, electricity, & art, don't understand the need for a fence	Valley Creek Park – Yes to water fountain & revegetation/ riparian planting – No to the other proposed projects	The lower cougar creek trail becomes a muddy mess whenever it rains. Both ends of it are paved. Can we connect the segments? Also- rocky and somewhat treacherous.	Violet Crown Trail – I support beginning at Phase 1	Reimagine Brodie – As much prairie plantings with native plants as possible	I support making all water/wastewater improvements & draining improvements necessary	Trail Connections – Yes to both	I feel most of this is overkill. Trails and spaces are already beautiful. I would like some more places to sit in the shade along the trail. I would also like to make crossing Brodie easier (more important than paving or improving trail). Water pipe fixes seem like obvious top priority. Preventative maintenance is good for longevity of area.	I would love to see a food forest in the City of SV
City Hall Backyard – No “improvements,” Please leave it as is	Savanna Trail – I'd like to see this area left alone for now. No fencing. The water fountain is fine. Maybe we even wait on electrical until we see how it gets used over the next few years and then revisit.	Valley Creek Park – I'm not sure I see the need to put up the fence to open up the extra space – I like that it's currently an untouched area that is simply visible from the trail.		Violet Crow Trail – There are so few that use Brodie Lane for walking. Do we need to spend money? Get the cost estimate 1st for the minimal improvements.	Reimagine Brodie – Keep any planting NATIVE	Water & Wastewater – Yes to all	9 Reese/10 Sunset – yes remove slab & yes remove fence	No surveys @ City Hall. Keep Labyrinth! Yes to electricity @ Savannah. Keep working to make uplands benefit for SV!!	What about adding a zip line to the city somewhere?
I cannot believe there is a large measure of support for a labyrinth. That seems like unnecessary expenses and useless feature.	Savanna Trail – No electrical services. Yes water fountain. No experimental art, no fencing along ERW	Valley Creek Park does not need improvement. There are 2 parking spots. We do not want to turn our street into a parking area. The equipment there can be repaired for far less than new equipment costs installed.		Violet Crown Trail: Not much to offer here, usage is sparse. Suggestion: Let it age & save money here. [...] the investment	If the goal of reducing lighting along Brodie trail paths is reducing cost, I think we should look for other ways to reduce costs. Lighting serves as a deterrent for crime. It is a safety feature for users and invites usage.	Drainage: The trails leaving The Meadows Yellowtail Cove cul-de-sac is muddy and a rocky area is unsafe.	Trail Connections – Yes		Fence at apartments on south SSV city limits is falling. It's in the deed restrictions that they maintain the fence, please enforce - Lease back of Gault Property? ~
City Hall Backyard – I didn't think a labyrinth would be a good fit in that space. Swings are the most needed play feature there.	Savanna Trail: Yes to water fountain & revegetation. No to the rest of proposed phase 2	Valley Creek Park: Yes. Improve playground equipment. Any added feature would bring more usage & enjoyment by all.				Drainage: only support detention renewal if TCEQ forces us –	9 Reese/10 Sunset Trail – Planned changes seen good		In general as much prairie restoration of our open spaces as possible.
City Hall Backyard – no slide & swings, no labyrinth		I'm a Reese resident so I'd say I'm partial to Valley Creek Lane. It is perfect the way it is. I suppose a new water fountain would be nice, but the playground structures are fine. I think it's a waste of money to replace perfectly fine and fun equipment.					I'm a Reese resident and I walk the Reese/Sunset loop daily. A simple single track or crushed granite trail through the lots would be nice so my walk would be a figure 8 or loop! Thanks! (Meander along the creek perhaps?)		Speaking generally – we should save our money and try to work on burying our power lines and/or purchase SSV Elementary
		Valley Creek Park – 2nd water fountain 2nd priority, 1st revegetation / riparian planting none of the other suggestions
